What is DeFi

A parallel financial system built without the need for central intermediaries, that is open to anyone anywhere, with users having full control of their assets.

Decentralised
Exchanges

Liquidity &
Yield Farming

DEX vs CEX: Spot Trade Vol.

SOURCE: COINGECKO

1st Reason: Not Your Keys Not Your Tokens

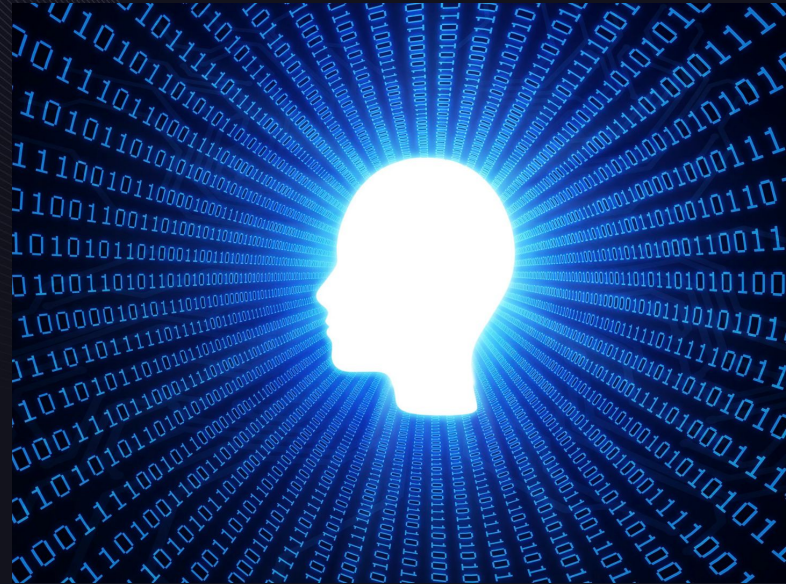

- You don't need to trust intermediaries
- You need to trust yourself and your private key
- Your wealth is controlled by you

2014 Mt. Gox Victims

2nd Reason: No Personal Data

- No KYC
- No Personal Data Leakage
- No Tracking Personal Data

3rd Reason: Decentralized Future

- No limits, it's not important what is your race, religion, nationality
- Financial inclusion with Wall Street benefits
- DeFi has a soul

Miami Bull Statue

Even a billion dollars of capital cannot compete with a project having a soul.
Ethereum Co-Founder, Vitalik Buterin
